

LET'S **MOVE**!

"BTS has changed the way we run our business! When we decided to service more of our member visits through BTS group programs instead of equipment, our numbers began to go through the roof! Within a 3 year period we added over 16,100 group visits a year which resulted in a 13% increase in our retention rate. Our increase in retention has had an exponential impact on our net income.

P.S. Another direct correlation is that we have reduced the need for new equipment and equipment maintenance costs have been significantly reduced. The longer we work with BTS the more pleased we are."
